ADDRESS: 894,59TH CROSS,KUMARASWAMY LAYOUT, BENGALURU 560078

Summary

As a recent graduate with a Good foundation in front-end technologies combined with proficiency in back-end development using Java and a keen interest in further developing my front-end skills, I'm well-positioned to excel in web development

Projects

1.ludo Simulation

Ludo Simulation, developed with HTML5, CSS3, and JavaScript, delivers an engaging and interactive web experience.

2.job Consultancy

A job consultancy website developed with HTML5 and CSS3 offers a basic, static web presence.The website serves basic informational purposes, but may not offer the dynamic features expected in modern job consultancy platforms.

see my projects through the provided link below:

https://github.com/Sumuk0902/my-projects

On-Going Certification Course/Internship

An internship with the National Skill Development Corporation (NSDC) as a Junior Full Stack Java Developer provides a valuable opportunity to gain hands-on experience and enhance my skills in web development. this internship offers a chance to make a meaningful impact on skill development initiatives.
